Full Stack developer and IT Technician. A proactive individual who is interested in contributing to a project either as a collaborator or as a leader. With over 3 years of formation in the field, I specialize in providing solutions to computer-related problems and web development that are both efficient and scalable.

Experience

Intern – Full Stack Developer | Deenex

Sep 2025 – Nov 2025

- Full-stack development of a production-ready PWA for restaurant chains, used by both end users and administrators, working on real business workflows.
- Implemented a user application redesign that simplified onboarding and initial navigation, significantly reducing user friction.
- Optimized operational processes in multi-location environments by simplifying payment configuration and drastically reducing the number of steps required to onboard new branches.
- Worked with React, RTK Query, Node.js, Express, and MongoDB under agile methodologies (weekly sprints, daily stand-ups, and version control with Git).

Intern - Backend Developer | Equality

Jun 2024 – Oct 2024

- Backend development using Django and PostgreSQL, contributing to the creation and maintenance of REST APIs in an agile environment

Education and Language

Bachelor's Degree in Digital Business — Universidad Austral (in progress) 2025–2029

IT Technician — Instituto Politécnico Superior 2019–2024

English: Cambridge First Certificate (C1) 2024
